

Reasons to buy Navigator

When you choose Navigator over an everyday paper, you are reducing your total costs. By using our premium paper, you can save time and money while getting excellent printing results. **Pure Logic.**

Increased productivity. 99.99% paper jam-free.

Fewer jams means lower cost per printed document.

Improved surface. Provides excellent printing quality whilst reducing toner consumption.

Silky touch. Extra smooth surface. Navigator improves the lifetime of office equipment.

Multifunctional. 100% guaranteed for all printers and copiers. Navigator can be used for all your documents.

Increased productivity per day

The certified performance of Navigator means that it jams once every 10 000 sheets, as opposed to 5 jams of other office papers. Taking into consideration that a paper jam can take up to 3 minutes to solve, depending on the type of printing equipment of photocopier used, this can translate in a potential gain in productivity.

Optimal balance between paper rigidity and thickness to provide outstanding performance: 99.99% jam free. A reduction in jams means an increase in production speed and fewer processing errors.

Toner consumption and improved print quality

Navigator developed an improved surface which provides excellent printing quality. By improving toner adhesion and absorption, Navigator maximises print results – more printed sheets with the same cartridge.

Paper abrasiveness and lifetime of office equipment

Navigator is on average 1/3 smoother than most office papers. This smoother surface means lower toner/ink consumption and reduced abrasiveness, resulting in less damage to printers and a longer lifetime of office equipment.

The net result is lower maintenance costs (fewer replacements of machine parts) and ultimately, a lower cost per printed page.

Platinum 24lb

Extra soft – microporous surface for fast ink drying and precise absorption for high definition images.

Platinum 28lb

Superior thickness and smoothness – Achieve a feeling of superior quality, ideal to add value to your communication.

Platinum 32lb

The best image definition – For double-sided printing without transparencies, even in color applications

Platinum 60lb

Excellence in digital color printing – Perfect for image quality with high contrast and definition.

Relevant Information:

- ★ Navigator is produced by an integrated mill from forest to paper.
- ★ High quality fiber – by using the best quality fiber – *Eucalyptus globulus* – Navigator guarantees optimum paper characteristics for excellent printing results.
- ★ The operating decision to always use the same raw material means Navigator ensures the maximum level of quality and consistency of its paper, each and every time.
- ★ It's smoother, more opaque and has an excellent thickness/stiffness ratio, which allows for jam-free printing and a better printing quality, even in duplex applications using colour.
- ★ Environment – our responsible forest stewardship ensures the renewable supply of *Eucalyptus globulus* fibre and the preservation of biodiversity.
- ★ All the forests managed by The Navigator Company are certified guaranteeing the origin of its raw material. Our main certification systems are: FSC (Forest Stewardship Council), PEFC (Programme for the Endorsement of Forest Certification Schemes). In addition, all of grupo Portucel Soporcel's mills are certified according to Ecolabel (European Sustainability Measurement).
